

CLIENT CASE STUDY >>>

Automating Aircraft Transition Reporting to Ensure Compliance with Lease Obligations

CHALLENGE

When transitioning aircraft, lessors and lessees must ensure their mutual compliance with the various lease obligations. A **global aircraft lessor** wanted to automate aspects of this process with the aid of robust reporting tools.

Zeevo professionals worked with the lessor to **develop and implement a new Leasepoint® installed report** to project redelivery condition compliance and maintenance status details at redelivery or earliest possible termination.

>>> APPROACH

- ▶ Designed, developed, and implemented a new custom branded SSRS report
- ▶ The SSRS report incorporated the logic required to perform the redelivery and maintenance status projections
- ▶ Remediated the maintenance events, redelivery conditions, as well as asset and component data required to support the new report in Leasepoint

>>> OUTCOME

- ▶ The client benefited from the availability of on-demand aircraft transition reporting as an installed Leasepoint or stand-alone report
- ▶ Enabled the lessor's team to quickly project redelivery conditions compliance and maintenance status detail, using different utilization scenarios
- ▶ Delivered the custom-designed and branded aircraft transition report

ZEEVO'S VALUE ADD

- ▶ In-depth knowledge of Leasepoint, including the underlying data model
- ▶ Subject matter specialization to design and implement the aircraft transition projected values logic
- ▶ Designed, developed, tested, and implemented the new SSRS report

WHY ZEEVO?

Our experience and expertise

Our style and passion

Our team of professionals

Our commitment to a strategic relationship
