

CLIENT CASE STUDY >>>

Enhancing Aircraft Technical Project Management with Web Application Integrating Fleet and Contract Summary Data

CHALLENGE

The **head of technical** at a **global aircraft lessor** wanted to improve the department's operations when performing the essential aircraft delivery, return, sale, and part-out project management functions.

Zeevo professionals **developed an integrated .net web application**, leveraging fleet and lease data in Leasepoint®, to inform decision-making by enabling tracking and visibility into key technical project details.

>>> APPROACH

- ▶ The solution includes features to track delivery, return, sale, and part-out tasks, timelines, and resource assignment details
- ▶ Automated the creation, re-scheduling, and re-assigning of technical project tasks via an integration with Leasepoint®
- ▶ Developed a timeline view of upcoming and completed transactions and workload planning reports and dashboards
- ▶ Hosted the app on-premise and integrated it within the existing office 365 tenant authentication framework

>>> OUTCOME

- ▶ The client benefited from the automated extraction, integration, and transformation of Leasepoint® fleet and contract summary data to effectively manage technical projects
- ▶ Provided the ability to record project details and notes in addition to tracking issues to resolution, asset in-possession and availability dates, engine location history, resource assignments, and assigned task modifications
- ▶ Delivered the requested reporting tools, web-enabled dashboards, and a timeline view for on-screen display

ZEEVO'S VALUE ADD

- ▶ In-depth knowledge of Leasepoint® modules and the underlying data model
- ▶ Expertise in developing and deploying integration solutions
- ▶ Development of custom branded and integrated desktop and web applications
- ▶ Expertise in business intelligence reporting and dashboard design and implementation
