

CLIENT CASE STUDY >>>

Boosting Reporting Capabilities with a Power BI Business Intelligence Tool

CHALLENGE

A **global aircraft lessor** wanted to use the Power BI business intelligence tool to enhance their reporting capabilities.

Zeevo professionals worked with the lessor to **implement a data warehouse solution** that leveraged the data from Leasepoint® and a collection of data warehouse aware MS Excel spreadsheets to fill any reporting data gaps.

>>> APPROACH

- ▶ The available Leasepoint web services was used to source data and save it to an on-premise data warehouse SQL database, with scheduled periodic refreshes
- ▶ Implemented a collection of controlled MS Excel spreadsheets to collect and transform required data values, capable of reading from and saving to the data warehouse
- ▶ Designed the SQL data views and functions to deliver the Power BI data model requirements

>>> OUTCOME

- ▶ The client benefited from a suite of MS Excel spreadsheets connected to the data warehouse and the ability for users to input, transform, and save any data required for operations or reporting
- ▶ The data warehouse incorporated the data repository needed to build out the required Power BI reports and dashboards
- ▶ Integrated data was made available for use in Power BI, advanced reporting and analytics, and other third- party tools

ZEEVO'S VALUE ADD

- ▶ In-depth knowledge of Leasepoint®, including the underlying data model
- ▶ Designed, developed, tested, and implemented the required MS Excel spreadsheets for recording required additional data values
- ▶ Designed, developed, and implemented the Leasepoint web services to SQL data warehouse solution
- ▶ Subject matter specialization to design and implement the data warehouse

WHY ZEEVO?

Our experience and expertise

Our style and passion

Our team of professionals

Our commitment to a strategic relationship
